The formula for calculating the Top Rated 250 Titles gives a **true Bayesian estimate**:

$$\text{weighted rating (WR)} = (v \div (v+m)) \times R + (m \div (v+m)) \times C$$

Where:

- R = average for the movie (mean) = (Rating)
- v = number of votes for the movie = (votes)
- m = minimum votes required to be listed in the Top 250 (currently 25000)
- C = the mean vote across the whole report (currently 7.0)

For the Top 250, only votes from regular voters are considered.
